Re: OSHPD # 106220733

To Whom It May Concern:

There were no changes in Chargemaster pricing during the 2019-2020 fiscal year. There were also no new services added during the fiscal year so, all changes in gross charges were due to volume changes.

In years where there are no changes to the Chargemaster the methodology used to arrive at this percent change is to divide actual YTD gross charges per department by the volume percent increase for that department and sum the adjusted totals. This methodology takes into account changes in utilization.

Sincerely,

Matthew Matthiessen,  
Chief Executive Officer
